

6.5"x6 60W 100V Line Column Speaker

SPEAKER : SL6-060

The SL6-060 is a flexible full-range speaker, designed for both indoor and outdoor settings, and built to meet IP44 weather resistance standards. It's perfectly suited for various events and locations, from places of worship and parks to halls and lecture theatres. The speaker comes with an adjustable bracket, allowing you to fine-tune the sound direction to match your needs.

Although its power rating may seem modest, the SL6-060 delivers impressive performance, producing clear and powerful audio that easily fills larger spaces. Its combination of reliability and adaptability makes it an excellent choice for any environment, consistently providing high-quality sound.
